

The **Orthopterists' Society** (formerly the Pan American Acridological Society) is an international scientific organization devoted to facilitating communication among those interested in Orthoptera and related organisms, and to encourage collaborative research and control programs in Orthopterology among countries of the World. We foster research and publication in all aspects of Orthopterology. The Orthopterists' Society (OS) currently has 440 members from 60 countries on six continents. Membership is open to all individuals interested in the Society's objectives.

The Society serves its membership through:

- The refereed **Journal of Orthoptera Research** published twice a year
- **International Meetings** held every four years at different locations throughout the world
- **Publications on Orthopteran Diversity** as well as occasional papers
- The society's newsletter **Metaleptea** published three times a year, free to all members of the society.
- **A program of small grants** to young professionals and graduate students for research in Orthoptera
- Its cooperation with the taxonomic database **Orthoptera Species File online (OSF)** (<http://orthoptera.speciesfile.org/>)
